

The award winning SmartStream Air allows organisations to **match any data for any reason in an instant**

Cloud native and ready for use on day one **SmartStream Air is the fastest AI data quality application available today**

Why SmartStream Air? **Because when it comes to your data, you don't want to miss a thing**

DATA MANAGEMENT IS A SIGNIFICANT CHALLENGE

High volumes of low quality data, multiple external and internal data sources and format proliferation makes traditional, IT project based onboarding models unsuitable for a huge variety of data integrity checks and tasks. SmartStream Air was created to provide the solution to this problem and challenge it in these three areas:

DELIVERY MODEL

- No need to implement, go live same day, switch on, ready for use
- Cloud native, SaaS only, no upgrades, no support needed, no burden

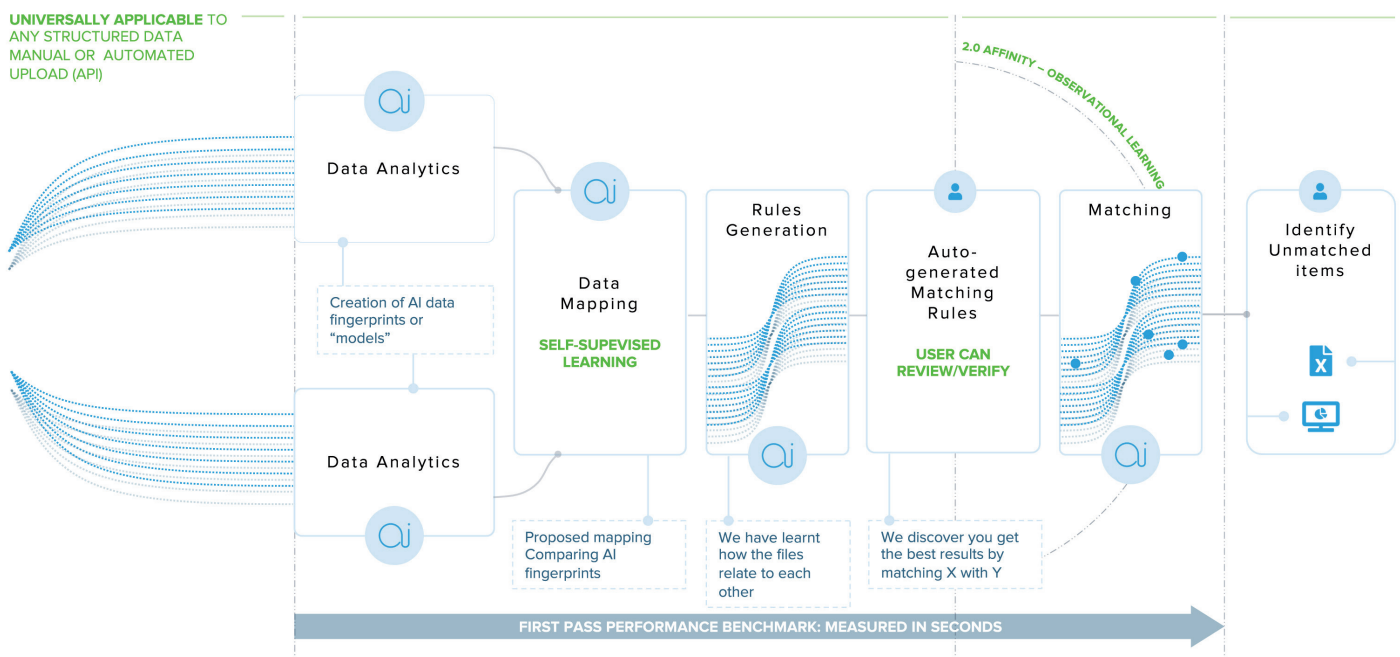

TECHNOLOGY

- Drop in low quality data, any shape, size or structured format
- No training is needed, SmartStream Air leverages AI to perform the task end to end and behaves like a consumer app
- AI technology completes a process usually measured in weeks and months in seconds

SCALABILITY

- No constraints to scaling volumes and adding new functionality – continuous innovation
- Total cost of ownership is transparent and can be controlled

UNIVERSALLY APPLICABLE TO ANY STRUCTURED DATA MANUAL OR AUTOMATED UPLOAD (API)

SMARTSTREAM'S INNOVATION LAB DESIGNED AIR TO PROVIDE:

- Pure AI automation of all data integrity tasks
- Acceleration of technology projects
- Technical and business agility at ultra fast speeds
- Complete removal of implementation and professional service costs and IT project delays
- Reduced (near elimination) human effort and time spent on data checks
- Readiness for future requirements / unknowns
- To lower risk and ensure nothing slips through the cracks

WHERE DO WE SEE INEFFICIENCIES WHEN COMPARING HIGH VOLUMES OF DATA FOR ACCURACY AND COMPLETENESS?

- Wherever **spreadsheets** remain in place to compare data sets
- **Inter-system** comparisons of data
- Transactional business **reconciliations**
- Compliance and regulatory **reporting validations**
- **System migration projects**
- **The data checks you aren't doing** because there isn't a tool that can do it

CONTROL	IMPROVE	OPTIMISE	THROUGH AUTOMATION OF MANUAL WORK WITH AN AI ENABLED SAAS SOLUTION WE ACHIEVE:
EXCEL AND MANUAL RISKS Trades/Positions /Fees Multi-asset transactions Scalable Auditable Regulation Compliance Audit	IT AND TRANSFORMATION PROJECTS System migration and replacements Compare new and old Ensure nothing is lost Validate your assumptions Clarify scope Track progress Distribute work globally	DATA QUALITY AND ANALYTICS Control decay of data Link system data together Quickly define standardisation designs Centralise siloed business areas Be future ready, better MIS and the unknown	CONTROL that can be evidenced COST REDUCTION in time and resource EFFICIENCY GAINS productivity <ul style="list-style-type: none"> • Errors don't fall through the gaps • Auditability • Scalability • Competitive edge and business agility • Fast ROI

ABOUT SMARTSTREAM

SmartStream is a recognised leader in financial transaction management solutions that enables firms to improve operational control, reduce costs, build new revenue streams, mitigate risk and comply accurately with regulations.

By helping its customers through their transformative digital strategies, SmartStream provides a range of solutions for the transaction lifecycle with artificial intelligence and machine

learning technologies embedded – which can also be deployed in the cloud or as managed services.

As a result, more than 2,000 clients – including 70 of the world's top 100 banks, rely on SmartStream Transaction Lifecycle Management (TLM™) solutions to deliver greater efficiency to their operations.
