

Best Trading Platform/Order Management Product

Philippe Chambadal, chief executive at SmartStream, receives the award from Dan Barnes

SmartStream

TLM Trade Process Management

SmartStream provides enterprise-wide, real-time Transaction Lifecycle Management software solutions that deliver sustainable ROI through non-disruptive business transformation. These solutions are used by 1,000 clients, including more than 75 of the world's top 100 banks, to deliver control to the transaction lifecycle.

Using SmartStream's range of TLM software solutions, clients can tackle the barriers to STP and create more efficient, customer-focused, cost-effective, compliant operations. SmartStream develops TLM solutions for a range of operations. TLM Trade Process Management is a highly-scalable software solution designed to deliver integration and control to the post-trade environment of investment managers, broker dealers, banks and custodians.

TLM Trade Process Management delivers:

- Enhanced operational control by consolidating fragmented and siloed post-trade infrastructures for equities, fixed income and derivatives, into a unified operations platform that monitors and controls instruments across their lifecycle
- Lowered operational risk through automated, workflow-based software providing a full and audited view of all trade activity from deal capture to allocation, confirmation and settlement
- More cost-effective operations by retiring multiple legacy systems and paper-based processes with a single solution across multiple instruments
- Increased efficiency through proactive trade monitoring, pre-emptively alerting users to prevent exceptions from occurring
- Greater operational flexibility and scalability to respond to market and client demands across the range of instrument types
- Improved customer service through proactive and exceptions-based processes that efficiently manage reconciliation and trade confirmation backlogs for a faster resolution

Highly Commended

SunGard

Combining sales, risk management and trading – across asset classes – in a single system, Front Arena offers the investment house a powerful tool for the securities business.

Thomson Reuters

Reuters Order Management for Exchange Execution provides direct trading capability in conjunction with its flagship product Reuters 3000 Xtra.

Exceptional performance. With intelligent automation across all derivatives types, TLM Trade Process Management delivers proactive and efficient post-trade operations – **whatever the markets throw at it.**

Isn't it time to drive down the cost of your operations?
