

SmartStream expands presence in Asia with new Chinese partner TGT Chibo Data Service

September 12
2018

SmartStream Technologies has announced the appointment of TGT Chibo Data Service, a Chinese technology services and payment solution provider, as an official distributor partner for SmartStream's TLM solutions in the Mainland market. This new agreement will allow TGT Chibo Data Service to initially market SmartStream's reconciliations solutions to the financial sector in China, including banks, asset managers and third-party administrators.

Mark Taylor, Regional Director Asia Pacific, SmartStream.

TGT Chibo Data Service will provide the local infrastructure and local representation, whilst SmartStream will provide proven post-trade processing technology for the local market. The addition of SmartStream's solutions will enable TGT Chibo to provide a full suite of back-office operational capabilities to the Chinese banking market.

"For the past year, we have received many requests from Chinese banks wanting help in streamlining their back-office operations and maintaining regulatory compliance. The strategic partnership with TGT Chibo Data Services is a natural one which complements our work in the region, we are already working together to play an important role in supporting the local banks. In addition, having a regional partner will enable us to extend our value to the market and to strengthen our position in Asia", said Mark Taylor, Regional Director Asia Pacific, SmartStream.
