

Coronation Fund Managers goes live with SmartStream system

October 24
2018

South Africa-based Coronation Fund Managers has gone live with TLM Corporate Actions OnDemand from SmartStream Technologies.

“We continue to make investments in our business, specifically in technology that enhances our clients’ service experience, and which allows us to achieve greater operational efficiencies,” said Llewellyn Smith, COO at Coronation.

“Through SmartStream’s tailored solution, we achieve automation of our corporate actions operational processes. Given that this project ran in parallel with a number of strategic initiatives, its successful implementation was essential. We value SmartStream’s corporate actions expertise which guided us through the procedure in less than four months”.

Coronation is using the TLM® Corporate Actions OnDemand solution to process mandatory and voluntary events, including proxy voting for their domestic and international markets.

Adam Cottingham, Product Manager, added: “Working in partnership with Coronation has made this project a success. The team adopted our Model Client Configuration to accelerate delivery and achieve a rapid return on investment for the business. It’s great that Coronation has become the first TLM Corporate Actions client in South Africa”.
